

## Exercising coordination

The following verbs are all scrambled up. Sort them out in groups of coordinates to study them. In some cases, you'll need to gather coordinates or hyponyms that correspond to a common hypernym like "look". In some other cases, coordination depends on a common semantic area like "posture". You may want to complete the list with more coordinates and create a digital mind map from each group. You may also complete the phrases/idioms the terms belong to, use them in sentences later or use any other strategy to foster consolidation.

*glimpse    sprawl    snigger    stoop    squat    roar*

*titter    gape    glare    lean against*

*glance    crack up    prop up    gaze    squint*

*howl    peer    chuckle    peep    giggle*

LOOK	LAUGH	POSTURE
